

# THE SOLUTION

YOU NEED TO  
MANAGE VISITORS TO  
YOUR SCHOOL

**QUICK,  
EASY,  
ACCURATE,  
VIGILANT...**

**SCHOOLDEFENDER™**

By TouchMate®

## UNAUTHORIZED ACCESS SEXUAL PREDATORS HANDWRITTEN LOGS

### Improves Security

- Badge visitors to show visit is approved
- Import sexual predator lists
- Use Watch List for denying entry, or for identifying VIP visitors
- Check photos to confirm adult ID before releasing a student
- Print temporary badges for staff, substitute teachers, suppliers and central service staff
- Works with Tempbadge self-expiring visitor badges

### Easy To Use - Speedy Processing

- Scan a license and print badge in under 20 seconds
- Screen profiles tailored to each type of user
- Speed badging by using info from past visits
- Print badges in advance
- Pre-register visitors or groups

### Flexibility and Reporting

- Use in school or district offices
- No more handwritten logs or badges
- Valuable reports easily accessed and printed
- Import name lists and pre-print badges for school events

### Multiple Languages Available

- English
- Spanish

## SchoolDefender™ Visitor Management Solution Assure School Safety and Security with Visitor Badging

Educators face a critical challenge: Assure the safety and security of students and staff by managing visitors, parents, volunteers, temporary employees, and suppliers; and comply with district security standards and procedures.

The SchoolDefender system is powered by PassagePointEDU™, the most comprehensive and proven visitor management application available. Installed in thousands of locations, this application is mature and reliable. This system meets the specific needs of K-12 schools and districts. It can be implemented for a single school, selected schools in a district, entire school districts, or in a centrally managed configuration for multiple school districts.

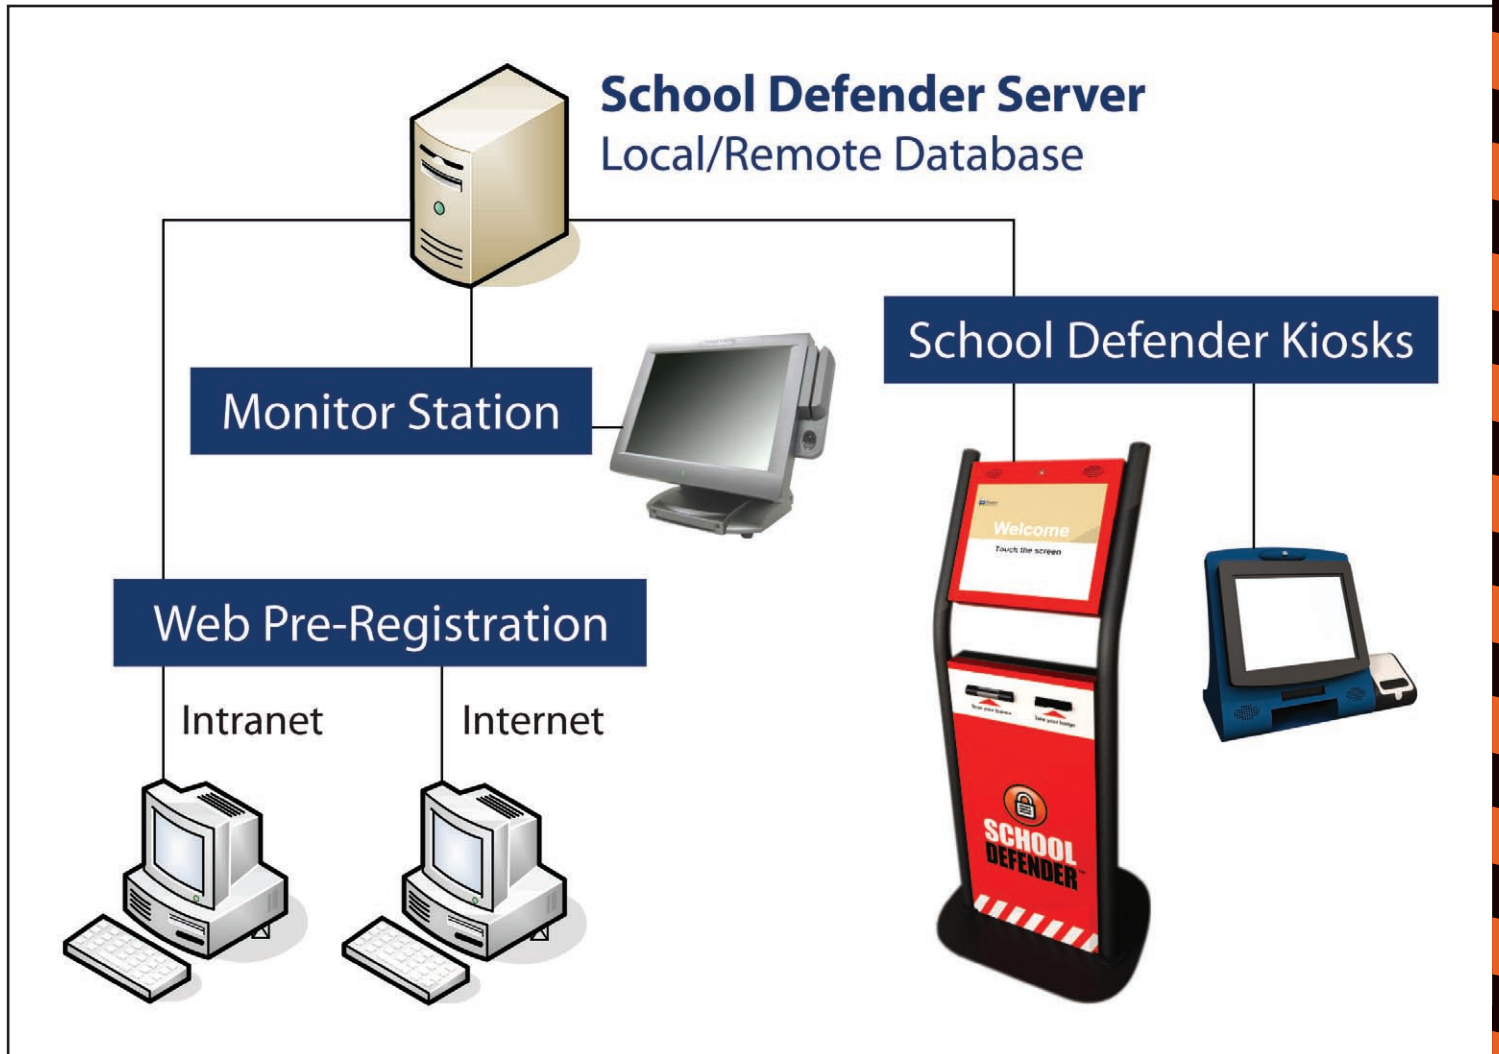

PassagePointEDU's powerful software allows each school to tailor the application to their needs including customizable screen graphics, categorizing types of visitors, pre-authorizing visits, designing visitor badges, defining clearance rules for each visitor type, and implementing email and mobile messages and alerts.

With TouchMate's SchoolDefender, school staff can be sure they have accurate information on child custodial issues. Watch lists can be imported to provide onscreen warnings of those who should be denied access to school premises, or to notify staff of VIP visitors. Easy to use tools simplify customization.

The SchoolDefender system interacts with external sources to check a visitor's identity against a 50-state Sex Offender database. The clearance is made in seconds and a badge produced immediately. The system provides extensive reporting and visitor statistics. This system is effective in assuring compliance with school visitor policies. An unauthorized person is easily identifiable by their lack of a visitor's badge. The need for temporary identification badges for substitute teachers, paraprofessionals, and visiting staff from other schools is easily handled by the SchoolDefender system. Visitor badges can be prepared in advance for large gatherings held in a school's building, facilitating registration, eliminating the need for separate name badges, and providing awareness of who is in the building. In the event of an emergency, SchoolDefender helps in clearing a building by listing all active visitors and the person or area they were visiting.

TouchMate provides many choices within the SchoolDefender system including floor, countertop and wall-mounted touch-screen kiosk self-service stations, inexpensive office monitoring stations, printing and scanning options, proximity detector, biometric input, central Server options, add-on digital signage, and much more.

Eliminate the old sign-in books where illegible names and incomplete information have been the norm. Let today's technology help keep your school safe. SchoolDefender is easily and quickly installed. We provide assistance and training. Nothing is more important than keeping your students safe!

### Hardware Setup Wizard

- Makes adding hardware easy with a step-by-step wizard and a smart installer that pre-installs most required drivers

### Control Center

- Able to control multiple locations from a central point
- Centralized tool for configuring special policies and settings to be applied to each location
- Create custom screens specific to each location
- Design badges and printing policy for each location

### Access Control Integration

- Integrate existing security systems with SchoolDefender enabling activation of access rights for each visitor
- Barcode on badge can be used to allow visitor entry through secure ACS locations
- Access privileges deactivated when badge expires or when visitor is logged out

### Database Flexibility

- Choose from several database options including SQL Server, Oracle, MySQL, and PostgreSol

### Versatile email Capabilities

- Email notification with photo to host on visitor sign-in
- Allows host to pre-schedule visitors

### Live Background Check

- Real-time searching against the latest background and sex offender databases supplied by a company that fully complies with the laws and regulations governing this data

### No Risk to Personal Data

- No visitor's personal data is ever exposed to potential theft or misuse by storing any information outside the physical domain owned and operated by the school or school district

### Complete Support

- Help desk support available around the clock, 365 days a year
- On-site repair service available
- 3-year equipment warranty
- Expert installation team assures quick and trouble-free implementation
- Custom application development services, on-site training, and product upgrades available
